

Sustainable Event Management Workshop

Monday August 11 and Tuesday

August 12 2008

400-21 Water St. Vancouver BC

604-802-1565

Presented by: Ecomikaan

Speaker: Rob Roy

Ecomikaan is a progressive environmental management consultation firm which analyzes the needs of your organization, and develops an environmental strategy based on those needs.

This workshop will focus on the event management industry and British Standard Institutes 8901:2007 standard for sustainable event management systems. Attendants will be guided through the application of this standard.

BS 8901 provides requirements for planning and managing sustainable events of all sizes and types.

BS 8901 encompasses the entire range of events ranging from large scale conferences and unique events such as the 2012 Olympics to music festivals and air shows.

The standard is applicable throughout the sector supply chain encompassing venues, organizing companies and industry contracting firms, and is aimed at event organizers, venues, organizations and/or individuals in the supply chain.

BS 8901 will:

- * Help companies to improve sustainable performance within available budgets
- * Reduce carbon emissions and waste, improving the resource efficiency of the entire event supply chain
- * Present opportunities for more efficient planning and encourage the re-use of equipment and infrastructure. The standard covers:
 - * Reduce environmental impacts such as carbon usage, waste management and effects on biodiversity
 - * Improve social impacts such as community involvement and fair employment
 - * Establish economic impacts such as local investment and long-term viability

The workshop will start at 10am each day and end at 3:30pm. It will include lunch, coffee, and snacks.
